Námestie 1. mája č. 1,
P.O. Box 104
810 00 Bratislava
Slovakia

I would like to express my opinion as a reviewer of the scientific, didactic and organizational achievements of doc. Lucia Dimunová, PhD. for the inauguration process - the title of professor. In certain aspects, she far exceeded the requirements.

She displays active attendance at conferences both in Slovakia and abroad. She is involved in a significant way in the development of theory and clinical practice of Nursing. She is a member of a number of scientific and professional organizations. She currently works as an associated professor and she has participated in various internship abroad. During her professional journey, she has progressed through individual positions gradually. She began her career as a nurse in hospital and after completing her study at the baccalaureate degree program she moved to the University for the position of university teacher in the field of Nursing.

All of the above-stated are prerequisites which lead both to professional and personal maturity. She cooperates multidisciplinary regarding both education and clinical practice.

I am confident that due to her responsible approach to teaching activity, scientific-research activity and based on the criteria I confirm, that the candidate meets the requirements for the title of professor in the field of Nursing.
