### **In the case of writing theoretical bachelor thesis:**

**Introduction:** introduction of the problem in a broader context and an indication of its justification, the current state of the solved problem, defining the objectives of the bachelor thesis.

**The core of the thesis:** contains theoretical part and discussion. The theoretical part provides an analytical overview and the methods used to explore the selected topic. This part requires an in-depth elaboration based on the knowledge of relevant domestic and foreign literature. The correct citation technique is necessary in this section.

**Conclusion:** Summary of the results of the research and a brief evaluation of its importance. In this part of the thesis, it is necessary to declare whether the pre-set goals have been achieved. It is also important to point out the problems that could not be solved and suggest a way of solving them if possible.

### **PRESENTATION OF THE ISSC WORKS:**

Using MS Power Point (part of MS Office programs) is recommended during the presentation. The presentation should not exceed 7-10 minutes. The content of the presentation corresponds with the main parts of the work mentioned above.
